# OncoLUNG Dx - Order Form

## Biochemistry

Tumor Markers:  CA 15.3  CEA  CYFRA 21-1  
 NSE  ProGRP  SCC

## Anamnesis

### Personal Data

Gender:  Male  Female  UnknownAge (years): 

### Comorbidities

Chronic Liver Disease:  Yes  No  UnknownPempfigus:  Yes  No  UnknownPsoriasis:  Yes  No  UnknownRenal Failure:  Yes  No  Unknown

### CT Scan Image

CT Findings:  Nodules  Metastasis  No  
 UnknownNodule Size (mm): 

### Lifestyle

Smoking:  Never  Currently  Past  
 Unknown

## Order Information

Ordered by:  Signature: Order Date: 

## Disclaimer

According to Annex VII of Medical Device Directive 93/42/EEC, Class I, Rule 12, OncoLUNG Dx is a non-invasive blood test useful to suggest a possible diagnosis in patients with suspected malignancy in the lungs, reduce inappropriate diagnostic tests, days of hospitalization, as well as morbidity. It is specially designed for patients with previous image findings suspicious of Lung Cancer that should be biopsied to verify malignancy, as well as smokers older than 55 years.

OncoLUNG Dx is based in a panel consisting of 6 serum Tumor Markers (CA 15.3, CEA, CYFRA 21-1, NSE, SCC and ProGRP), as well as clinical data to obtain the best performance (Sensitivity of 93.5% and Specificity of 96.2%), by reducing the number of false positives generated by benign comorbidities and other well-known causes.
